Scotia UK plc t/a smots™ has donated this unit for the benefit of the public as detailed above. It is a condition of supply that you undertake to register the unit as above and actively check that the unit is kept 'emergency ready' (that means monthly check of device, pad/battery pack expiry date, accessory pack). Replacement PAD-PAK is available at £84 inc VAT. The PAD-PAK has a 4 year life if not used. Heartsine will provide a FREE replacement IF you download the log file after the unit is used in an event (download lead provided with AED and app available with submission form from <https://heartsine.com/forward-hearts/>). You can contact us here AED@smots.org if you have any questions (we can help you with the log file download too) regarding your AED. Please never store or send personal patient information or anything that might identify a particular individual other than their age, sex, geographic location.

We are proud to work with Heartsine who manufacture the Samaritan 500P here in the UK. You're in great company with British Airways on all flights and UK Coastguard among others.
